November 4, 1994

Reference: Lord-Shope RA Monthly Progress Report

Dear Mr. Turner:

Lord is hereby submitting five copies of the monthly progress report for November, 1994.

The following work was conducted during this period:

**REMEDIAL ACTION**

Lord has finalized arrangements with Dames & Moore on construction details for this Fall. Equipment will be brought on site the week of November 1, 1994 to commence construction. Lord now plans to complete the discharge line and manhole as well as installation of the foundation for the treatment building this Fall. This will enable a smooth transition to installation of the pre-constructed building early in 1995 and provide a scenario for completion of the project on schedule in 1995.

Lord and Eckenfelder have flagged the wetland areas so that precautions may be taken by contractors to not disturb wetlands during the construction process.

The PADER Bureau of Air Quality have notified Lord and Eckenfelder that the request for permit exemption for the air stripper control device will require an analysis for technical and economic criteria as presented in the OAQPS guidance document. Lord will proceed with this analysis as required.

**MISCELLANEOUS:**

The monthly inspection was performed and the site is in good condition.

At this time Lord no longer has access rights to Over Lake property and have therefore ceased all sampling and maintenance of wells and equipment on the Over Lake property. Our offer to

Over Lake to extend the current access agreement still stands. Lord has officially requested USEPA assistance to obtain access. Efforts to resolve overall issues, including access, have not been fruitful to date; negotiations are at a virtual standstill.

Yours truly,

LORD CORPORATION
